PROFESSIONAL SUMMARY

First-year college student pursuing networking and cybersecurity, with hands-on experience building and documenting infrastructure through a growing homelab portfolio on GitHub. Full-stack developer who has shipped a real-world web platform, with working knowledge of DNS administration, mail server configuration, and Linux system administration. Looking to bring that curiosity and hands-on troubleshooting mindset to a cybersecurity or IT internship.

CORE SKILLS

Core Competencies: DNS Configuration & Troubleshooting | Linux System Administration | Full-Stack Web Development | User Authentication & Access Control | Technical Documentation

Tools & Technologies: BIND9 | Postfix | Next.js | Express.js | PostgreSQL | Redis | Tailwind CSS | Git & GitHub

PROJECTS

BIND9 DNS Infrastructure Homelab | Personal Project | GitHub

2026 – Present

- Built a three-part DNS homelab series covering authoritative, root, and recursive resolver server roles under a shared home.arpa test zone.
- Diagnosed and fixed real configuration issues, including empty-zone interference and DNSSEC validation errors blocking resolution.

Postfix Mail Server Homelab | Personal Project | GitHub

2026

- Set up a local Postfix mail server on a home.arpa test domain, including Linux user provisioning and mail routing.
- Sent and verified test mail through multiple methods, confirming delivery by checking mailboxes directly on the server.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Kabataan Statistical Profile (KSP) | Puerto Princesa City, Palawan

February 2026 – May 2026

- Built a full-stack platform for barangay Sangguniang Kabataan (SK) officials to manage youth demographic data, using Next.js (TypeScript), Express.js, PostgreSQL, Redis, and Tailwind CSS.
- Developed an admin dashboard for approving or blocking user accounts, with a verification step required before new SK official accounts could access their dashboard.
- Implemented OTP-based email verification to confirm valid addresses, ensuring users could reliably receive account and notification emails.

IT Support (OJT) | Armed Forces of the Philippines | Puerto Princesa City, Palawan

April 2026 (80 hours)

- Prepared PowerPoint presentations for presenters ahead of official meetings, formatting content for clarity and consistency.
- Encoded and formatted Word documents for internal records, checking for accuracy before submission.

EDUCATION

Palawan State University | First Year, Expected Graduation 2030 | Puerto Princesa City, Palawan

Currently pursuing a degree with a focus on networking and cybersecurity.

STI College Puerto Princesa | Senior High School Diploma | Puerto Princesa City, Palawan

2024 – 2026
